The user must test the application of the product in the applicable conditions. A guarantee cannot be derived out the text of this technical description.

Hard Floor Cleaner

Regular daily cleaner for all surfaces*

User Instructions

(In conjunction with our SelectCare+ Dust Cleaning Pad and Spray Mop):

Before Usage: Spot test prior to application, and ensure the coating is intact before proceeding cleaning with the whole area.

- Use our SelectCare+ Dust Cleaning Pad to clean the surface. Surface must be dust-free before applying SelectCare+ Hard Floor Cleaner.
- Make sure the cleaning pad is wet but not excessive. Release a few triggers of cleaning fluid for every few square metres and proceed to mop the surface in a horizontal zig-zag motion.
- Rinse the pad in warm water as it becomes soiled, making sure to wring it out thoroughly before continuing to clean. Excessively soiled pads may be laundered in the washing machine.

Important: To avoid any water damage to your floors (timber, laminate, bamboo, etc), excessive water should not be used. Always use a lightly damp, 'wring out well' mop to clean your installed floors.

Drying Time

Approx. 15 minutes at room temperature.

Consumption

Approximately 400-500 m²/litre.

After Treatment

For the periodic maintenance of floors, continue to use our SelectCare+ Rejuvenator and Rejuvenator*Plus* (to be used annually or every 6 months, depending on traffic).

Special Information

After use, clean the tools with warm water. Do not mix with other cleaning products.
